YOUR PARTNER OF CHOICE

COMPANY PROFILE

*Beyond imagination...
we make the most complex technologies
simple*

KEY FACTS

INR 25M+ turnover

5,000+ licenses worldwide (excluding education)

20% of staff in R&D

75+ employees and distributors team

50% of employees work in the field

100% of employees focused on customer satisfaction

LET'S INTRODUCE OURSELF FIRST

Behind the CAD Macro 15+ years of international design & development experience. We take a direct, real-world approach to design, allowing you to easily respond to changes and make revisions with minimum effort. As well as giving you a massive increase in speed and efficiency. We work with organizations from a broad range of industries. From tool shops to OEM's

At CAD Macro, we realize the value of using the latest technology available to create the best quality design possible. That's why we leverage the leading, most up-to-date software in the industry.

Our specialist knowledge in a variety of industries enables us to realize innovative solutions by linking people, technologies and ideas. With around 30+ dedicated technical specialists in the field, we are capable of building and integrating new and innovative technologies into relevant industrial digital solutions for our customers.

CAD Macro is an established developer of innovative CAD/CAM solutions Industrial productive tools which optimize the production time and manpower.

Design develop complete IT solutions tailored to your industrial needs

Our team of consultants, solution architects, project managers, training specialists, and technical analysts come from manufacturing industry.

CAD Macro 's innovative CAD/CAM products such as Wire cut software (Wire EDM), Die Mold ERP software, CNC Turning software, CNC Milling software, Drill, Feature recognition, Press Tool Design software and other Customized Engineering Solutions. With our CAD/CAM and Industries application solutions, we serve the tool & die mold, automotive, manufacturing, high-tech, aerospace, defense & R&D, oil & gas and industries.

CAD Macro operates in the India, Singapore, Indonesia, Malaysia, Thailand, Taiwan, USA, UK,

ADVANCED SOLUTIONS, GLOBAL REACH

We are ranked among the world's top players in Manufacturing, Aerospace, Defence and Security, a global solutions provider and a trusted long-term partner of choice.

We have solid industrial capabilities, nurture an outstanding human capital and pay constant attention to innovation. On these pillars, we plan our future and create value for all our stakeholders, pursuing a path of long-term sustainable growth.

Headquartered in Chennai - India, we operate on a global scale, through a well-rooted industrial presence in domestic markets, an international commercial network and strategic collaboration.

VISION

To be the preferred Design and Manufacturing Partner to our valued customers and a key contributor to the successful use of innovation and technology in our chosen markets

MISSION

To provide world class design and manufacturing solutions, thereby helping our customers to achieve quality and productivity by reducing the cost and time to market.

CAD / CAM SOLUTIONS

Macro Wire (Wire EDM)
Macro Turn
Macro Detailer
Macro Inspect
Macro Drill
Macro Design
Macro EDM
Macro Nest (Laser, Plasma, Gas)

ERP / MEP APPLICATION SOLUTIONS

Shop Plan (Planning & Scheduler, MEP, ERP)
Shop Molds (Mold maintenance software)

YOUR PARTNER IN DELIVERING CAPABILITIES. ANYTIME, ANYWHERE

Being competitive in global markets requires technological and digital excellence, an international approach and customer intimacy throughout the lifecycle of products and relationships. We face these challenges with a qualified and reliable presence wherever we operate, putting our customers' needs at the centre of our thoughts and daily actions.

TEAM

K.Manickam - Heading the entire Road Map of CAD Macro as Managing Director after having achieved a comprehensive domain knowledge by handling various Lead Roles in the Die & Mould Vertical in various companies across South Asia for more than 23 years.

Dharani Kumar P B.E Graduate in CS. Worked and designed a wide variety of Windows and Linux/Unix technology stacks. Versed in CAD/CAM, Product Architecture, Algorithms, Product Life Cycle Management. Loves and believes in Open Source.

Saravanakumar has a rich experience of more than 2 decades. Having associated with top notch corporate houses like Godrej, Reliance, Tata, Aircel and Aptech, the multi-cultural, product industrial vertical in executive and senior level management positions have had him nourished wisdom on need-based innovative business modules.

Santhosh has over 13+ years of technical and engineering management expertise in CAD/CAM, Cloud, Test Automation, Virtualization and Storage, At Cad Macro, he is responsible for building and managing the company's intellectual property in CAD/CAM domain

Gowsick working in core development team with rich experience in CAD/CAM domain. Skilled in Wpf, WinForms, C Sharp, MySQL, WPF, GitHub and Tortoise SVN Strong engineering professional with a Master's degree focused in Computer integrated manufacturing from PSG College of Technology.

SHAPING TOMORROW'S TECHNOLOGIES

Technological innovation is one of the cornerstones of our Strategic Plan. To secure our long-term success, our products need to be innovative, fit for the future and tailored to market demands.

Collaborative innovation

For CAD MAcRO, innovation comes in many forms. It is not purely based on the work of individuals, but also depends on the sharing of ideas and knowledge among many players, both inside and outside the company. We work with universities, institutes and research centres, customers, suppliers and start-ups, to develop new technologies and products. Together with our internal expertise, these partnerships aim to develop and improve our technology and product portfolio for the future, as well as enhancing basic research.

Our technologies

We are working on innovation across a huge array of disciplines every day, to build on our technological heritage and strengthen our approach for the future. We invest mainly in technologies identified as strategic and with dual-use applications, that allow the Group to foresee market demands, satisfy customer expectations and increase its industrial efficiency. We are focusing mainly on CAD / CAM sensors, technologies for surveillance and counter measures, unmanned surveillance and environmental monitoring activities, advanced and innovative materials, software, cyber and systems competencies to design products and come up with effective solutions.
